First to Market

CC1413 HP P1006/P1005 Enlarged Hopper

T.P.E. are proud to announce their latest development, an enlarged HP P1006/1005 Hopper to compliment the already extensive range of T.P.E. Hoppers and replacement parts.

The T.P.E. HP P1006/1005 Enlarged Hopper is specially designed, developed and manufactured to increase the capacity of the HP P006/1005 (CB435A) OEM toner hopper fill weight from the OEM weight of 75 grams up to a maximum of about 160 grams. T.P.E. recommends a filling weights of about 150 grams. This Enlarged hopper can also be fitted with the OEM HP P1505 Waste Section to fit inside the HP P1505 printer. Actual toner weight will depend on toner being used.

This does allow remanufacturers to offer better value with a higher yield cartridge in the same way that the previous range of T.P.E. Enlarged Hoppers have done. This lowers the cost per page.

This hopper has been rigorously tested for durability. It comes fitted with Mag Roller support bearing, End Foams, Foam Lip Seal for Agitator Drive, Polyurethane Mag Roller Sealing Blade, Agitator Drive and Agitator Gear.

T.P.E. also offers a range of replacement parts for this series of cartridges.

CC1407 - Blended Bushing

CC1408 - IC Clip

CC1409 - Wipers

CC1410 - Exit Port Plug

CC1411 - Mag Roller Sealing Blade

CC1412 - Recovery Blade
